

ECO EXPO ASIA 2009

Hong Kong, October 28 – 31.2009

Eco Expo Asia – Asia's premier business platform for the environmental protection industry

Fintrade-Mercer Advisor Ltd. is organizing a special Finnish environmental technology promotion week during the Eco Expo Asia 2009. This promotion week will include exposure at the exhibition and high profile meetings, tailored to each Finnish company specifically, and access to the Eco Asia Conference, covering a variety of environmentally themed topics with particular focus on South East Asia.

The Hong Kong Hub for the International Environmental Protection Industry

South East Asian countries are facing many environmental challenges due to rapid economic development and urbanization. This has led to an exponential growth in sales of environmental instruments to deal with the issues arising from these developments. In order to cope with international standards, the region is now seeking ways to improve technology, institutional development as well as technical resources and knowledge.

Hong Kong is an important regional hub for business, both to Mainland China and Asia Pacific.

Eco Expo Asia and the environmental technology promotion week will be an ideal event for Finnish environmental companies to establish partnerships with Asian Pacific companies at a deal-making for retail and sales systems as well as joint ventures, alliances and marketing partnerships.
